VOCAL 100

CARDIOID DYNAMIC MICROPHONE

SOUNDSATION VOCAL series of microphones is the perfect answer to all those users who require rugged and reliable tools, able to improve the range of frequencies typical of male and female voices, and wink at its own wallet. The VOCAL 100 is a dynamic microphone with cardioid polar pattern whose sensitivity and frequency response will impress when compared to other models of same price range. Although it’s been designed for live vocal use, the VOCAL 100 is a great transducer even for acoustic instruments and percussions.

CARDIOID DYNAMIC MICROPHONE

PRODUCT DETAILS

KEY FEATURES

- Specifically designed for Singers
- Ready for KARAOKE applications
- Rugged construction
- On/off switch
- Cardioid polar pattern minimizes ambient noise and feedback
- Quality components
- 5m XLR Female - 6.3mm (1.4”) TS jack cable included

SPECIFICATIONS

Type	Dynamic
Directivity	Cardioid
Polar Pattern	Uni-Directional
Frequency Response	70Hz - 16kHz (±3dB)
Sensitivity	-57dB ±3dB (0dB=1V/Pa @ 1kHz)
Output impedance	300ohms, ±15%
Microphone Size (HxD)	
Carton Box Size (LxHxD)	23,7 x 6,5 x 10,5 cm
Microphone Weight	0,152kg
Carton Box Weight	0.43kg
