KP3 - PRO STAND KORG KAOSS PAD 3

0030101793

The Pro Stand KP3 was developed especially for the Korg Kaoss Pad 3 (not included). Due to its shape especially adapted to the Kaosspad, a perfect hold of the device is guaranteed. The professional Zomo equipment consoles are absolutely robust and designed for many years of use. Even the use in the mobile area cannot harm these stands. Zomo Equipment stands are adjustable in height and inclination as well as in right-left rotation. The devices can thus be optimally positioned in any desired position to allow quick access to the players and optimum view of the displays. If necessary, the position can be quickly and easily adjusted to changed requirements in a few easy steps, as the most important settings can be adjusted using quick-release fasteners. In addition, the mounting plates for the individual players are interchangeable and can therefore be quickly and inexpensively adapted when changing devices. The Zomo Pro Stand is mounted on the foot by means of 4 screws on any table top. The optional available base plate allows an easy mounting e.g. under the turntable without any holes are necessary and is preferably intended for mobile use. The high-quality powder coating is resistant to scratches and other negative environmental influences. All around a mature yet innovative product.

PRODUCT DETAILS

KEY FEATURES
