ZOMO FLIGHTCASE FOR EUPHONIA MIXER (NIGHT STYLE EDITION BLACK COLOR)

Made to withstand the most intense touring, the **Zomo Flightcase** for **EUPHONIA** mixer by **ALPHATETA** combines an aggressive black NSE (Night Style Edition) design with ultra-robust construction: 9mm laminated plywood reinforced with black anodized aluminum profiles and ball corners, providing maximum protection from bumps, scratches and extreme travel.

The lined interior with high-density protective padding wraps your AlphaTheta Euphonia like a glove, preserving it from dust and vibrations, while securely locking butterfly hinges (compatible with additional padlock) provide you with zipper and anti-theft security.

Weighing only 9.5 kg, it's the perfect choice for frequent travelers: approved for air and road transport, it's compact enough to be maneuverable yet built like a tank.

The devices shown and/or mentioned in the photos are NOT included in the delivery.
