FLIGHTCASE VC-1 XT - UK-FLAG

0030102124

There it is finally. The case which was missed of all DJs. The Zomo VC-1 is a transport case which makes the transfer of MIDI-controller like VCI-100 or VCI-300 much more comfortable, safer and easier. The solid and modern looking case made out of aluminum is stuffed with premium foam in the interior. This guarantees no damage at transfer by fidget about or falling down of the equipment. The 2 security locks at the front take care for the perfect support and not sliding away.
But the case can much more! The person who is working with Vestax VCI-100 or VCI-300 sometimes already knows how small place and exposed situations can be at the DJ-desk. Therefore Zomo had a stroke of genius to design a removable lid so that the MIDI-controller can be used directly in the case. Thought has been given to exposed ports and the simple handling naturally. A comfortable carrying handle as well as a shoulder belt (optional) make it very easy to the DJ to transport the equipment from A to B. A brilliant, modern case with fine new ideas which makes fun at working. Sheer genius and totally cool! It´s Zomo!
