QUARK 45

MICRO TUBE HEAD IN CLASS D - 45W

Ultra light, ultra compact and powerful: QUARK 45 unleashes **45W RMS** with its **class D** power amp and tube preamp featuring **12AX7 + FET** technology.

No harsh or artifcial tones, just analog-enriched, dynamic and distinctive voice ranging from cristal clean to biting distortion: whatever you need for your licks and riffs is just one tweak away.

QUARK 45 spots a remarkable arsenal of features for such a micro-sized machine: **2 channels, FX loop, Aux-In, Phone-Out, 2 speaker outputs, BT connection** and analog **VU-Meter** for signal monitoring during studio recording.

Great as back up head, sure, but incredibly performing during practice, rehearsals and recording sessions.
