DECK STAND - LAPTOP STAND ACRYLIC - RGB CONTROL

The optional Zomo laptop stand - RGB-Control made of acrylic is equipped with an LED bar and a connection cable for the RGB control. The RGB controller with infrared remote control is available in our shop. As soon as the stand is connected to the LED controller, the laptop stand can be illuminated in many colours and white. The controller has several integrated effects such as music control, color change and flashing. The luminosity can be dimmed in fine steps. Up to 3 different devices can be operated synchronously via one controller and controlled via the IR remote control included in the scope of delivery of the LED controller. The stand is made of high quality acrylic and can be mounted at 3 different positions on the Zomo Deck Stand. It offers space for any laptop or MacBook and lets your laptop seem to float above the devices. The laptop stand is extremely sturdy, easy to install, versatile and has a fantastic design. The available working area is 40 cm x 29 cm.
