DECK STAND RGB-CONTROL EXTENSION CABLE

The optional Zomo RGB-Control extension cable can be used for connections to your RGB-Controller. The scope of delivery includes 3 connection cables, each with one plug at one end and one socket at the other. The cables have different lengths and can also be plugged into each other. With these cables you can connect your LED RGB-Controller with sound control to the Zomo Laptopstand, the Zomo Headphone Stand or the Zomo Deck Stand Acrylic-front panel via RGB-Control. If the standard connection cables of the Zomo Controller / LED product are too short, you can adjust the length at any time with the extension cables offered here.
