MDRKIT-7

ACOUSTIC DRUMSET MICROPHONE KIT

MDRKIT-7

The SOUNDSATION MDRKIT-7 professional drum microphone kit is specifically designed for percussion, jazz drums and other acoustic drum instruments.

The microphones are designed in a small size for a better aesthetic appearance and discretion in relation to the drums used.

Each microphone is equipped with a high-quality capsule and its frequency response has been optimized for each microphone according to the percussion instrument (snare, toms, bass drum, cymbals).

The bass drum microphone is specifically designed for bass drums and low-frequency musical instruments due to its exceptional frequency response.

The drum microphone is ideal for toms and snares.

The condenser microphone is excellent for reproducing the sounds of cymbals, pianos, etc.

All microphone holder are designed with a standard 5/8' or 3/8' thread to fit all types of microphone stands and a standard XLR connector to fit all types of audio instruments.

The MDRKIT-7 kit includes stands for various types of microphones and also a sturdy aluminum flight case for easy transportation. The flight case has a pearl foam insert to provide excellent shock resistance.

Ideal for modern drummers, this kit offers maximum reliability in both live performances and studio recording applications.
