GLOBE-560XW

2-WAY OPEN-CEILING SPEAKER

Globe -560XW is a speaker designed for hanging on very high ceilings (for example, halls of exhibition centers, shopping malls, etc.), where there are no suspended ceilings or plasterboard structures. The look is elegant, minimal and the ABS material is of high quality.

On rear side, in addition to the Phoenix connections and the power selector, there is the thread for the eyelet screw to which hang on one or more security cables (a steel safety cable with 3mm section and 1m length is supplied).

The high-level sound quality is assured thanks to the coaxial transducer with 5.25" (135mm) polypropylene woofer and 1" (25mm) Tweeter with Titanium dome. The integrated line transformer allows the use with 70/100V lines and offers 4 powers + low impedance, to better adapt to different speaker configurations and amplifier powers. Housing finish is white but can be painted in any color.
