GPZ

AUDIO SYSTEM CONSISTING OF A 2X18“ PASSIVE SUB + 2X12” SLIM ARRAY BLACK

GPZ is a powerful and versatile passive audio system that combines a 2x18” powered subwoofer with 2 GH12 12” passive coaxial satellites featuring K-array™ SAT® (Slim Array Technology) and a stainless steel cabinet. This high-performance system can be driven by GPZA active system in a stereo configuration or by an external GA46 power amplifier.

Thanks to its impressive overall performance and the compact format of the satellites, GPZ is perfect for high-quality sound in a variety of settings, from large auditoriums, stadia, and theme parks to clubs, pubs, and other indoor/outdoor venues. Whether for rental or permanent installation, this system delivers exceptional sound quality and durability.

This passive system can also be combine with the active model (GPZA), whether it's for stereo configurations or to extend the satellite cluster and form an array.

HIGHLIGHTS

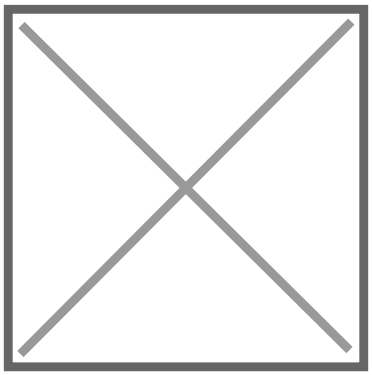

MAXIMUM DIRECTIONAL PRECISION AND INTELLIGIBILITY THANKS TO K-ARRAY™ SAT® TECHNOLOGY

K-array™ **SAT®** technology integrated into the GPZ system ensure **uniform and directional sound dispersion**, enhancing **listening intelligibility** even in complex or crowded environments.

SAT® (Slim Array Technology) combines **high sound pressure** and **phase coherence** in a **slim cabinet**, ensuring **powerful acoustic performance** with **precise long-range projection**. The result is a **lightweight yet high-efficiency system**, perfect for professional applications that demand **discreet design** and **superior sound quality**.

RESISTANT AND VERSATILE (SAT IP54, SUB IP43)

The stainless steel casing of the satellite and the birch plywood SUB makes it suitable for indoor and outdoor installations, increasing the opportunities for use.

PRODUCT DETAILS

KEY FEATURES

Powerful and versatile passive audio system designed to deliver high audio performance in various applications while maintaining flexibility of use in both mobile and fixed configurations.

Subwoofer (3000W power) with two 18-inch cones for deep, immersive bass.

Two passive “GH12” satellites with 12-inch coaxial drivers each for clarity and detail in the mid-high frequencies.

K-array Slim Array technology that enables wide and uniform sound coverage from compact and slim speakers, improving aesthetic and acoustic integration.

Ideal for both indoor and outdoor environments, for fixed or mobile applications.

Using the GPZA active model, stereo systems can be created or the number of satellites can be extended to form arrays, optimizing cost and sound coverage.

SPECIFICATIONS

Type	Powered 2x18” sub + 2x12” Slim Array Elements
Transducers	SUB
Frequency Response	30Hz – 20KHz (-6dB average)
Max SPL	137 dB
Rated Power	SUB
Coverage	V.30° - H.90°
Connectors	2x Speakon NL4
Nominal Impedance	SUB
Dimensions (W x H x D)	1035x2040x600 mm (40.75x80.31x23.6 in)
