"TETRATONE" BASSDRUM PEDAL BEATER

Introducing Peace's new TetraTone™ Bass Drum BeaterA Multi-Surface Alternative. Choosing the right bass drum beater is as important as choosing the right drum stick. Variables like weight, material, and the shape of the contact point all have an important outcome on how the drum will sound when struck. In response to this oft-overlooked tonal necessity, Peace introduces the TeraTone™ bass drum beater. Whether you want your kick to shake the Earth or purr like a kitten, TetraTone™ can deliver a bassdrum tone perfect for any situation. TetraTone's patented multi-surface design puts the player back in control with two different beater materials and four different contact shapes.
