10' PROFESSIONAL SERIES KILL SWITCH CABLE, STRAIGHT/ANGLE

Road-reliable and flexible, Fender Professional Series cables boast a thick gauge with high-quality components that transparently retain your tone without getting in the way. Featuring an integrated momentary kill switch, the Professional Kill Switch Cables automatically kill your electrical connection when engaged to prevent any electric pops when plugging into a guitar or amp jack. This feature also enables guitarists to create a stuttering effect by repeatedly engaging the switch during performance, serving as a creative tool for both hobbyists and performers. The Fender Professional Kill Switch Cable allows you to play with creative confidence and peace of mind.
