

HUSH-X SBT

PORTABLE ELECTRIC GUITAR - SUNBURST

HUSH-X is a portable electric guitar, a concentration of technology designed to combine performance, convenience and portability. Incredibly light and compact, HUSH-X features ergonomic quick-release frames to adapt in a blink of an eye to changing conditions.

Supplied with gig bag, earphones, shoulder straps, tuner clips, picks and cable, HUSH-X is powered by a 9V battery that can provide long performances, whether headphone sessions or real live.

HUSH-X SBT PORTABLE ELECTRIC GUITAR - SUNBURST

HIGHLIGHTS

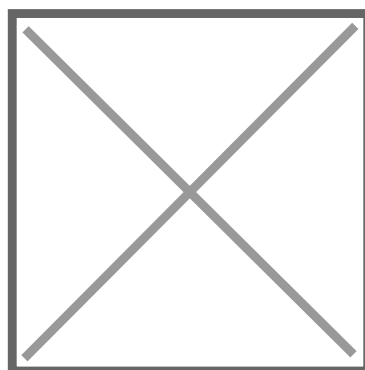

SUPER COMPACT AND LIGHTWEIGHT

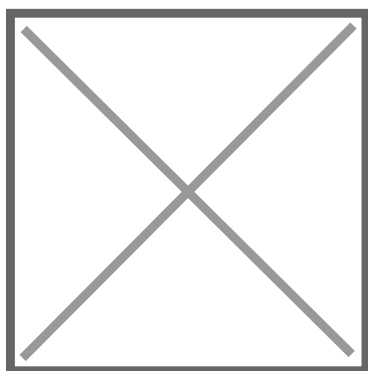

HUSH-X weighs a mere 2.40 kg... yes you got it right, roughly half the weight of a classic electric guitar! This results in maximum portability and comfort, but no loss of resonance due to the highly resonant body.

QUICK ASSEMBLY BODY FRAME

Ergonomic quick-release frames make it quick and easy to change the shape of the instrument, making it usable in different modes depending on your needs for space and comfort. Press the latches and pull out the frames-you're ready to store HUSH-X in the case and take it wherever you want.

HUSH-X SBT PORTABLE ELECTRIC GUITAR - SUNBURST

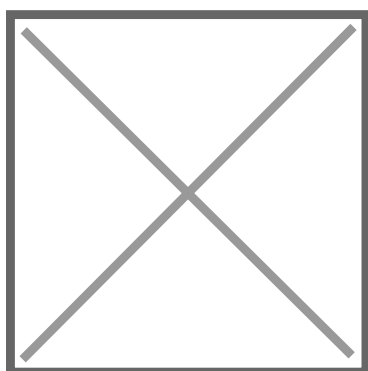

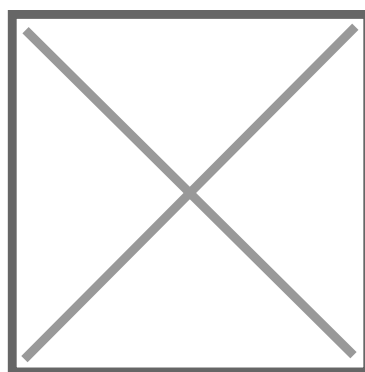

HEADLESS DESIGN + STABLE TUNING SYSTEM: ALWAYS IN TUNE

HUSH-X has a headstock-less design with a special string locking system that together with the tuning system ensures stability and minimal size.

PROGRESSIVE ASYMMETRICAL NECK

The progressive asymmetrical guitar neck is designed to ease pressure on the wrist area. Play better, play for longer!

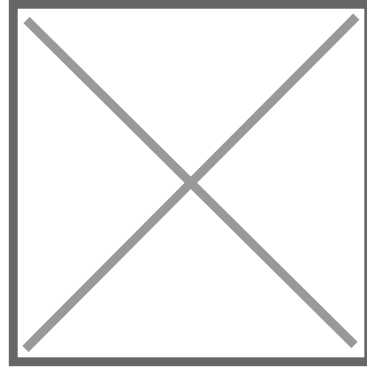

LONG LASTING SESSIONS

50 hours of playing via earphones (9V battery). You can also plug HUSH-X in your amp and play without a battery.

HUSH-X SBT PORTABLE ELECTRIC GUITAR - SUNBURST

GREAT TONE, GREAT CONTROL

HUSH-X is equipped with a humbucker and a single coil both Alnico V for a full and dynamic sound. With the Dynamic Tone Control System you can choose to use them in active/passive mode and sculpt your tone in detail.
