NDS-5 FIREMAN

DUAL CHANNEL DISTORTION

Fireman is based on the legendary amplifier builder's famous distortion pedal. It's a very amp-like distortion pedal with Modern Brown Sound. We designed it with 2 independent VOLUME, GAIN control knobs to fit rhythm and solo applications. FIREMAN offers a True-bypass / Buffer-bypass toggle switch, and a 9V / 18V toggle switch. The 18V position doubles the working voltage inside to give you wider dynamic range.

NDS-5 FIREMAN

PRODUCT DETAILS

KEY FEATURES

- Modern Brown Sound in a box
- 2 independent Gain, Volume knobs for rhythm / solo application
- 18V / 9V toggle switch to get different dynamic range
- True-bypass / Buffer-bypass toggle switch

SPECIFICATIONS

Frequency Response	20Hz~20kHz-±1dB
Input Impedance	2.2MO
Output Impedance	1MO
Power Supply	9V DC, Negative Tip
Dimensions	105(L)×115(W)×58(H)mm
Weight	460g
