ALL MESH DIGITAL DRUM KIT

HIGHLIGHTS

EXPRESSIVE HI-HAT

The hi-hat is mounted on its own hat stand, providing a more realistic feel as opposed to a fixed pad. Mounted onto a motion sensor unit, the hat can be easily adjusted to your playing style, including Open/Closed and Half Open hats.

12" REALISTIC SNARE DRUM WITH 3 POINT TRIGGER TECHNOLOGY

The DM-8 snare pad authentically emulates the behaviors of a real acoustic snare drum with its rim and shell design. The triple zone enables you to play convincing rim shots/and cross sticks while adapting to the needs of most playing situations from rock/funk/to latin and the cross stick is great for ballads or bossa nova.

The snare uses the latest three-point trigger technology, which makes the sound of each position on the drumhead more balanced. Also included is a very stable independent snare stand, for the best performance.

ALL MESH DIGITAL DRUM KIT

10" KICK DRUM WITH DOUBLE CHAINSTAY AND THICKER SOLEPLATE

The newly designed 10-inch independent kick drum can fully support a double bass pedal.

The new kick pedal features a double chainstay and a thicker soleplate. The double chain design makes the beater swing more stable, while the thickened base plate keeps the entire pedal from moving freely.

INNOVATIVE SOUND MODULE

The new DM-8 sound module is loaded with innovation and eye-catching features, including the Group Faders, which assigns audio levels to each individual pad. Create your own custom drum mixes easily!

Also included are 30 sets of high-fidelity drum kits with different styles. No matter the drum style, you can get the sounds you want from it. Intuitive and powerful sound customization features allow users to freely edit their own drum kits.

You can assign any sound to the rim or head.

USB AUDIO I/O: MANAGE AUDIO AND MIDI WITH EASE

The DM-8 module is also an audio interface, with the ability to send stereo audio and MIDI data to a Mac or Windows computer via USB. This lets you record discrete audio and MIDI drum tracks in any DAW, or trigger sounds from software based drum instruments for studio or live playing.

Want to record more than a stereo pair? No problem. You can record up to 14 separate audio tracks into your favorite DAW.

DM-8

ALL MESH DIGITAL DRUM KIT

FX SECTION: MAXIMUM FLEXIBILITY

Want to customize your drum sounds even further? The DM-8 includes a selection of high-quality effects that can be applied to each pad. Simply navigate to the EFFECT menu and select your effect.

Add EQ, Compression, Overdrive, or Reverb to the individual pads, or add a Master Compression and/or EQ to your overall mix.

JAMMING, RECORDING AND COACHING FUNCTIONS

Jam Away! The DM-8 has a great selection of built in songs that you can jam along with, including a dynamic variety of musical styles for every type of drummer.

Practice makes perfect! Record your solo drum performances onto a USB memory stick or upload your favorite backing track, play along with it, and save it as a WAV file to analyze your playing by hearing the entire mix play back.

And finally, an AUX IN port is provided to hard connect your preferred your playback device and create a solid mix between your backing tracks and your playing.
