JASON ISBELL TELECASTER® PICKUP SET

Armed with blistering guitar chops, incisive lyrics and a powerful voice, Grammy Award winner Jason Isbell has emerged as a leading face of the Americana movement - a dynamic blend of traditional roots music and modern rock.

Voiced by tone guru, Tim Shaw, the custom-designed Jason Isbell Signature Telecaster Pickups boast vintage-style parts wound hot with a touch of sparkle for the best of both Tele and Strat sounds. The bridge position is based on Jason's '65 Telecaster pickup and delivers the twang, sparkle and fire Jason is known for while the neck pickup uses a slightly taller bobbin that allows for more winds, providing a touch of Stratocaster character.
