ENGINE ROOM™ LVL8 POWER SUPPLY, 230V EUR

Pedals need clean isolated power and Fender's Engine Room® LVL8 Power Supply is capable of the task. Featuring eight ground isolated power outlets, (6) are capable of delivering 9Vdc at 500mA while (2) additional outlets provide switchable voltage (9v/12v/18v) via 3-way toggle or slide switch. Perfect for performance or studio players and can be daisy-chained with our LVL12 for players looking for more tonal variety.

The Engine Room® Power Supply is designed by our in-house team of experts in Southern California. The chassis is crafted from lightweight, durable anodized aluminum, and its sleek, low-profile appearance is engineered to accommodate most pedalboards. Also features a 2-color LED indicator for each output, green indicating current consumption. Road-tested and ready for live or studio use, Fender's Engine Room® Power Supply is built to power your performance.

ENGINE ROOM™ LVL8 POWER SUPPLY, 230V EUR

PRODUCT DETAILS

KEY FEATURES

8 ground isolated outputs – 6 outlets fixed 9Vdc at 500mA and 2 outlets with switchable voltage (9v/12v/18v)

Global mains input voltage (100-240Vac) 50/60Hz for use anywhere in the world

Standard IEC mains voltage connector

SPECIFICATIONS

Material Anodized Aluminum

Voltage 230V EUR

Output 8 - Ground Isolated Outputs; 6 (9V/500mA), 2 Switchable (9V/500mA, 12V/375mA, 18V/250mA)

5V USB-A and USBC output for charging smart devices

Dimensions (WxHxD) 244x42x91.3 mm

Cable kit included 4 x 2.1mm barrel connector 24" (60cm) length, 2 x 2.1mm barrel connector 18" (45cm) length, 2 x 2.1mm barrel connector 12" (30cm) length, 1 x 2.5mm to 2.1mm barrel, 1 x 2.5mm to 2.1mm barrel reverse polarity, 1 x 3.5mm TS to 2.1mm barrel, 1 x 9V Battery clip to 2.1mm barrel
