STAGEMAN FLOOR NAP-5

STAGEMAN FLOOR ACOUSTIC PREAMP & DI WITH LOOPER

STAGEMAN FLOOR NAP-5

NUX Stageman Floor is an analog acoustic preamp with digital effects and looper function. Preamp featured with a highly sensitive 3-band EQ with MID scoop toggle switch, adjustable notch filter, and input gain control. And it provides a ginormous headroom which delivers the sound all natural. It is equipped with Reverb and Chorus effects and, each effect designed to control by only one-knob, when you tweak the chorus or reverb knob from 0 to 10 it adjusts multiple parameters with a perfect balance. And the chorus switch is a momentary footswitch, while you push and hold, it will activate the freeze effect until you release it. Also, you can optimize the preamp input according to your guitar pickup type, you can set Piezo or Magnetic for better signal processing. And it has the FX Loop input, you can use a TRS cable and connect any effect unit to Stageman Floor. When you push both footswitches, Stageman Floor turns into a looper pedal with 60 seconds recording capacity and unlimited overdubs. It's also the best choice for various acoustic instruments like the violin, mandolin, banjo and many more.
