FLIGHTCASE SET-3000 NSE

The Zomo Set-3000 NSE Setcase is specially made for two Pioneer CDJ-3000 DJ Media Players and one Pioneer DJM-V10 Mixer. The Set-3000 NSE extends the product range of the NSE (= Night Style Edition) from Zomo by another flightcase. This stylish equipment case is very stable to survive the hard DJ use without any problems. Scratches as well as shocks cannot harm the Set-3000 NSE, thanks to the stable, laminated 9mm plywood. Produced for the roughest stage use, the Zomo Equipment Cases are suitable for touring. Practical butterfly latches hold the lid incredibly stable and allow an easy opening and closing. For extended security all NSE flightcases can be locked with an optional padlock. To protect the DJ media player from negative influences the CDJ-3000 equipment case is equipped with an excellent inside padding. In addition to the professional quality, the current design in the midnight black NSE Edition makes the Pioneer DJ Case a guaranteed eye-catcher! The extra strong and black lacquered aluminium profiles and solid ball corners guarantee a very high durability and set noble as well as professional design accents.
