RANE PERFORMER NSE PLUS FLIGHTCASE

030103517

The Zomo Flightcase Rane Performer Plus NSE Flightcase is custom-made for the Rane Performer Controller. With the flightcase in the sophisticated **NSE (= Night Style Edition)**, Zomo expands its range with a new equipment flightcase. Besides the stylish look, the equipment case also impresses with its **robust construction**.

Thanks to the extra-strong, black-coated aluminum profiles and the **extra-massive ball corners**, the Zomo DJ case offers **very high durability**. The **practical interior padding** of the Flightcase Rane Performer Plus NSE ensures secure protection of the Rane DJ controller against **scratches, defects, or other damage**.

The stylish, advanced design in the black NSE (= Night Style Edition) completes the Zomo Flightcase concept not only with its incredible, professional quality but also in terms of design. The helpful butterfly latches allow for easy opening and locking and ensure an **extremely secure hold** of the lid. All NSE equipment cases can also be locked with an **optional** lock.

Cigarette embers, heat, and abrasion cannot harm the Flightcase Rane Performer Plus NSE, thanks to the high-quality **laminated 9mm plywood**. Designed for the rough stage environment, Zomo equipment flightcases are of course road- and flight-ready.

The front panel can be quickly and easily removed, even **when your DJ gear remains in the case**.
