

## ACE OF TONE NDO-5

# ACE OF TONE DUAL OVERDRIVE

---

**ACE of TONE** is a dual overdrive pedal stacked with **Tubeman MKII** and **Morning Star**. Why? Because great guitarists love 2 overdrives to stack their tone. In the left corner: Tubeman with FAT mode.

Tubeman offers way more clarity and gain than any classic Tubescreamer, and we modified the circuit with a useful secondary function by simply holding the footswitch FAT mode. It cranks way more bass response to enhance the low-end yet makes the tone warmer!

In the right corner: Morning Star with SHINE mode. Morning Star is based on legendary Bluesbreaker circuit: very transparent, low gain drive. Like our Morning Star, it also features a simple footswitch HOLD to engage the iconic SHINE mode. In SHINE mode, you can get way more treble sound to make your tone crystal-clear.
