

BZ-1A

ACTIVE PIEZO PICKUP BZ-1A FOR BOUZOUKI

Humbucking, soundhole-mount design with active electronics for bouzouki

BZ-1A converts your instrument's natural, resonant tone to a high-fidelity signal ready for an amp or audio mixer.

Neodymium magnets in an active, humbucking design bring a warm, clear, and strong amplified tone with plenty of depth.

BZ-1a offers a balanced output level between strings and installs without blocking the soundhole.

BZ-1A

ACTIVE PIEZO PICKUP BZ-1A FOR BOUZOUKI

HIGHLIGHTS

UNIVERSAL FIT TO ALMOST ANY STEPPED-FINGERBOARD BOUZOUKI

The magnetic part of the pickup was developed to install in practically any bouzouki having a "step"—a flat surface at the end of the fingerboard. The clever design doesn't block the soundhole of the bouzouki and doesn't interfere with its resonance.

HUMBUCKING, SOUNDHOLE-MOUNT DESIGN WITH ACTIVE ELECTRONICS FOR BOUZOUKI

BZ-1 converts your instrument's natural, resonant tone to a high-fidelity signal ready for an amp or audio mixer.

Neodymium magnets in an active, humbucking design bring a warm, clear, and strong amplified tone with plenty of depth.

BZ-1 offers a balanced output level between strings and installs without blocking the soundhole.

WOODEN HOUSING

The magnetic element is encased in laminated birch with an elegant and stylish black plastic cap. This lightweight assembly achieves maximum tonal sensitivity.

ACTIVE DESIGN

The built-in preamplifier reduces noise and eliminates string grounding. The pre-amp also shapes the tone of the pickup specifically for bouzouki. The pickup requires 2 CR2032 batteries for operation.

NEODYMIUM MAGNETS

BZ-1A utilizes the power of neodymium magnets to provide a warm, clear, and strong amplified tone with plenty of depth.

NATURAL BALANCED SOUND

BZ-1A offers a balanced output between strings, and captures and reproduces the natural, resonant tone of the bouzouki.

COMPLETE INSTALLATION SET

The pickup features a single screw mount, a standard of many bouzouki pickups, and a pre-wired output jack.
