

NBP-5 BASS PREAMP + DI STOMPBOX

MLD signature Bass Preamp + DI features fully sweepable midrange frequencies in addition to bass and treble controls. The preamp sound is designed by the respected musician Melvin Lee Davis, who roked together with NUX for creating a pedal with a huge range of action. Built-in Amp Model & Cab Sim (Impulse Response) with software for avanced editing make this pedal a real must for demanding bass players.
