

GOLD DRIVE OVERDRIVE

OVERDRIVE - HANDCRAFTED BOUTIQUE STOMPBOX

The Goldrive works better than most overdrive pedals when used with Humbucker equipped guitars. It is transparent and open, not overly compressed and cleans up well with volume change. The Gold knob adds sparkle and punch to the higher frequencies. At higher gain settings the texture of the sound gets complex and thick with a tube like feel and it delivers a balanced, throaty crunch that borders good old distortion.

GOLD DRIVE OVERDRIVE

PRODUCT DETAILS

KEY FEATURES

Enhances playing dynamics

Great for guitars with humbuckers

Goes from clean boost to medium gain distortion

Works very well with other pedals

Can be used as Gain boost to push a tube amp

True Bypass Switching

Handcrafted in Israel

Power Supply: 9V
