METAL CORE DELUXE MKII

HIGH GAIN PREAMP PEDAL W/ IR OUT

HIGHLIGHTS

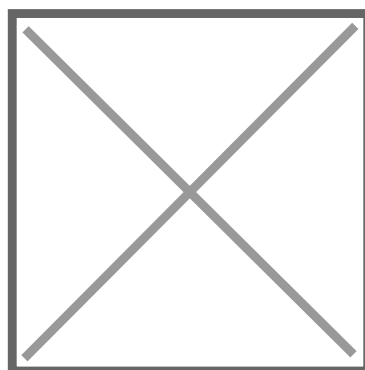

DUO RECT: BASED ON THE MESA BOOGIE DUAL RECTIFIER

The Duo Rect is based on the Mesa Boogie Dual Rectifier. The familiar 90's American metal sound with the iconic metal front panel that reminds you of countless classic records, from metal to punk to grunge, including Metallica, Tool, Korn, Soundgarden, Foo Fighters and Blink 182.

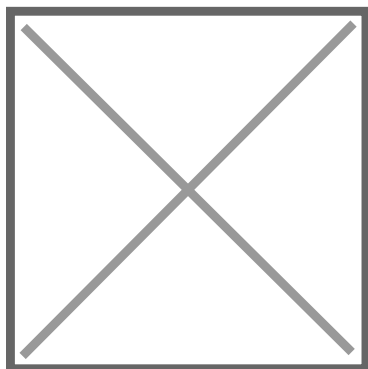

FIREMAN: BASED ON THE FRIEDMAN BE-100

The Fireman is based on the Friedman BE-100, the man behind the signature tones of rock icons including Eddie Van Halen, Steve Stevens, and Jerry Cantrell. For over a decade the "BE" circuit has been hailed as the epitome of British tone.

VH4: BASED ON DIEZEL AMP

The VH4 is based on the Diezel Amp of the same name, which revolutionized the industry with its 4-Channel and individual inserts design. This amp covers a wide range of tones. It has a thick, articulate and “meaty” sound, that is loved by many players. And because of its flexibility, the VH4 is used in many recording studios all over the world.

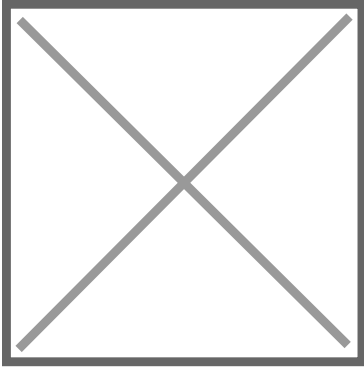

AMPLESS & IMPULSE RESPONSES

Impulse Responses play an important parts when it comes to going ampless, as it gives you that cabinet sound to complete your tone quest. Each of the included amps on the METAL CORE DELUXE MKII have a matching IR to go sonically along with it.

You can load your own favorite 3rd party IRs via the MetalCore editing software. Please visit the product page and download the editor (METAL CORE DELUXE MKII supports 512 samples IR resolution.). The MetalCore editing software will convert the IR file automatically, just make sure that your IR file is in WAV format.

METALCORE EDITING SOFTWARE + EFX MOBILE APP WITH OTG CONNECTION

You can tweak the parameters and load 3rd party IRs through MetalCore editing software. Connect the USB cable to the pedal and PC, open the editing software, and that's it.

If you don't have a computer, you can edit the pedal on the go for live applications with the EFX Mobile APP.

Note: For iOS, you must use a Lightning to USB adaptor. While some Type-C to Type-C can work with Android, using an OTG adaptor, can ensure that most Android systems will work with METAL CORE DELUXE MKII properly.

PRODUCT DETAILS

KEY FEATURES

3 high gain Amp Models in a compact enclosure

Duo Rect: Based on Mesa Boogie Dual Rectifier

Fireman: Based on Friedman BE-100

VH4: Based on Diezel VH4

IR out for amp-less application (512 samples resolution)

True-bypass

Parameters auto saving into 3 models

Low power consumption (less than 120mA)

TSAC-HD modeling offers realistic playability and response

SPECIFICATIONS

Input Impedance	1M?
Output Impedance	1k?
Dynamic Range	104 dB
DSP Processing	48KHz / 32-bit
A/D D/A Sampling Rate	48KHz / 24-bit
Power	9V DC (Negative tip, Optional ACD-006A adapter)
Current Draw	less than 120mA
Dimensions	122(L) x 72(W) x 47(H) mm
Weight	270 g
