

MI-65S

MINI TOMS PAIR WITH STAND

With space at a premium, the compact MI-65 Mini-toms answer the call for more sounds in a small area. The two shallow metal shells are connected- visually similar to a pair of bongos, and the 6" and 5" diameter tunable toms produce a short, powerful percussive effect. Coming with sturdy stand, it can be adjusted both in height and angle for best fit.
