## **D-PRIME 4 NSE - FLIGHTCASE DENON PRIME 4**

The Zomo D-Prime 4 NSE is a Flight Case suitable for the Denon Prime 4 Controller and inspires with great features. The D-Prime 4 NSE completes the selection of the popular NSE Edition by Zomo with another flight case. In addition to the advanced optics, the Equipment Case can also inspire with a stable construction. The D-Prime 4 NSE can withstand shocks and scratches thanks to the robust, laminated 9mm plywood. Developed for the arduous tour use, the Zomo Flightcases are in any case tour-suitable and protect your sensitive equipment from defects, leaking liquids or falls. Professional and beautiful design details are provided by the extra wide and black painted aluminium profiles and extra stable ball corners, which give the equipment case an absolutely high resistance. To prevent the controller from shaking, the Prime 4 equipment case is equipped with excellent internal padding, which protects the equipment from shocks, scratches or other negative influences. Even if your DJ gear is still in the flightcase, the front bar can be quickly and easily removed before your performance. In addition to the professional quality, the advanced design in the black NSE (Night Style Edition) makes the Denon Equipment Case a safe eye-catcher! The practical butterfly snap locks ensure an incredibly stable fit of the cover and easy unlocking and locking. All NSE equipment cases are also lockable with an optional lock for increased protection against thieves.
