MFC-6000 - FLIGHTCASE DENON DN-MC6000 MKII - BLACK

The Flightcase MFC-6000 XT is a bargain offer in the product line of Zomo. This Flightcase is accurately fitting for the DN-0030102525 MC6000 MKI / MKII Mixer by Denon. Your Mixer is well protected inside the Zomo Flightcase as there are two offset rack panels inside on which you can affix your device absolutely secure with screws. In the rear part of the case there is enough space for wires and controls. At the front there is a functional damper. When you take it off there is an extra-large opening for simply use the Denon DJ Mixer/ DJ Controller inside the case. Your Denon DN-MC6000 MKI / MKII Mixer/Controller is well threatened inside. The Zomo case is with a stabile shell that is made of excellent, high quality materials like resistant aluminum profiles and the rounded edges. Actually, there are small rubber feed at the bottom and on the lid of the Zomo Flightcase. These plastic parts shield the surface from the Flightcase of scratches. Besides, the interior padding is made of soft foam material. Just contact us to check out, if your 19” device is fitting, too. Of course the Zomo Flightscase MFC-6000 is not only convincing professionals by its gorgeous design but also by its functionality. All in all the MFC-6000 XT by Zomo is not only cool designed but also finished to a high quality Flightcase. Sheer genius and totally cool! It´s Zomo! ** The pictured or mentioned devices are not included in the package. Those are available separately in our shop.
