HIGHLIGHTS

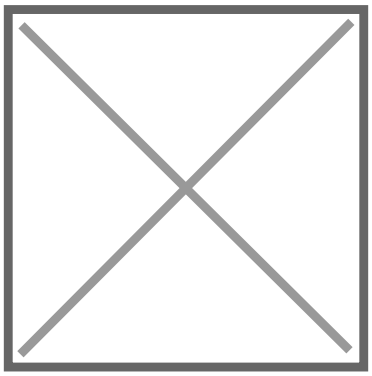

COMPACT DESIGN

The DM-110 offers a more compact and space-saving design. Its frame is better aligned with the layout of acoustic drums, ensuring a more comfortable and natural playing experience.

The DM-110 features a sleek yet durable frame, with a metal-welded central section that combines a space-efficient design with lasting stability.

UNIQUE SOUND MODULE DESIGN

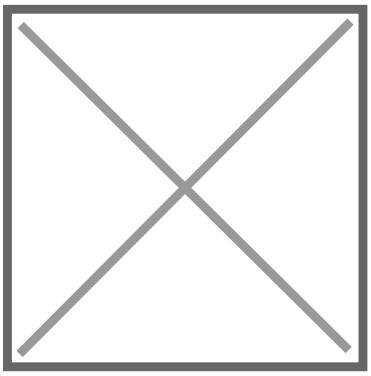

Simple and smart module, equipped with just 3 buttons for quick adjustments of metronome speed, drum kit selection, and output volume. You can also place your phone or pad on the holder of the module, connecting it to the DM-110 for more precise and complex operations.

THE EXCLUSIVE APP DRUM TOUCH

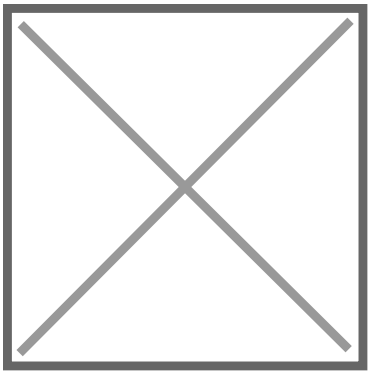

Drum Touch is an exclusive app designed for NUX DM-110. By connecting to drum machine, it allows easy access to all the module’s features, providing you with an enjoyable playing experience.

The app features a professional, intuitive, and efficient metronome interface, allowing you to adjust speed, volume, time signature, rhythm patterns, and sound - making it easier to listen, learn, and play.

USB AUDIO & MIDI

The DM-110 sound module doubles as an audio interface, allowing you to send stereo audio and MIDI data directly to a Mac or Windows computer, or your mobile phones/pads, via USB. This feature enables you to record discrete audio and MIDI drum tracks in any DAW or trigger sounds from software-based drum instruments, perfect for both studio recording and live performances.

AUX IN RECORDING

If you're concerned about the hassle of connecting multiple pieces of equipment to record drum cover videos, the DM-110 has you covered. Its AUX IN recording function offers a convenient, one-stop solution. With just a 3.5mm TRRS audio cable, you can simultaneously record audio and video directly to your mobile phone, making the process effortless and streamlined.
