THE TRAPPER® DUAL FUZZ

Fuzz is essential to the sound of modern music. Ranging from smooth and polite to sputtering and broken-sounding, this effect is the heart of rock and roll. The Trapper® combines two discrete fuzz voices into one chassis with global Tone and Contour controls to shape your sound to taste. The softer-sounding first voice includes a switchable high octave—perfect for generating synth-like tones—while the grittier second voice includes a highly interactive noise gate.

Designed by our in-house team of experts, the Trapper® Dual Fuzz is an all-original Fender circuit. The chassis is crafted from lightweight, durable anodized aluminum, and the Amp Jewel LED gives your pedalboard the classic Fender look. The switchable LED-backlit knobs show your control settings on a dark stage at a glance.
