GENUINE LACQUERED FINISH CANADIAN ROCK MAPLE 5 PCS DRUM SET

Those with a passion for playing drums who demand the best have historically opted for maple shells. In keeping with that tradition, Peace's flagship Paragon series is constructed of 9-plies of the Canadian rock maple - the best of the best.As a discerning professional's choice and like other boutique drum kits in its class, Paragon series drums are customizable with respect to desired shell sizes - diameter and depth, and Astro Pop to Velvet Plum - is available, allowing players to create a totally personalized set-up.Additional notable features unique to the Paragon series include Peace's proprietary Patented Lug Integrated Floating Suspension (LIFTS) system and Peace's patented DA-121 and DA-122 Deus Microtube Lugs - not to tension rods like typical crescent mounts. This not only assures less stress to crucial tuning points, but it also makes changing heads while the tom is mounted possible.Great looks,fantastic sound and tech-friendly design, all add up to make these state-of.the-art drums. Modern Drummer magazine gave its seal of approval in a product review, stating: "These drums really sing...Peace has created a high-end kit that's priced lower than many comparable models form other manufacturers."Paragon drums are only offered as shell packs.Hardware from Peace's extensive catalog is available separately.
