KEY RING WITH BLOODWOOD WOOD PICK

All the magnificence of the colourful Timber Tones in key ring form. In addition to looking good, they give a good grip to your bunch of keys and introduce you as a guitarist of great taste to the eyes of the world. We all know a guitarist who claims good plectrums are not worth it because he/she loses them on a regular basis. Well now that your keys are attached to it, you have no excuse! And you better watch out. Although Bloodwood has a lower Janka number than Macassar Ebony and Sonokeling it has a much closer grain and as such polishes smooth giving very similar tonal characteristics to Ebony. As such Bloodwood is highly recommended for electric guitar.
