MONO-STICK HD-120 - BLUE/WHITE

The Zomo HD-120 Mono-Stick is the particularly cool version of the Zomo headphone series, which is particularly popular in club use and features a swivelling ear cup and an ergonomic handle. The detachable spiral cable has a very stable plug and can be changed in seconds. Particularly with this one-ear solution, it is important that the listener has enough pressure to be able to make the necessary volume even in extremely noisy environments such as discotheques. The kick-bass optimization mentioned above brings the desired effect. The high-quality workmanship and the brilliant design create an increased style factor, which is particularly noticeable in the club area. The high-quality materials and drivers guarantee a long-lasting and professional sound experience of the highest quality.
