

SMW-420WT

2-WAY PASSIVE 4" FULLRANGE SPEKER WITH LINE TRANSFORMER (HIZ, 8OHM) WHITE COLOR (PAIR- 2 PCS)

The Adagio series is the perfect loudspeaker choice for background music applications. Whether at low volumes like in retail environments or at more elevated sound levels as in hospitality use, there is a choice for every purpose in this range. Being tuned for the high dynamics and extended frequency response of pop music, this line of speakers not only looks good, but first and foremost provides a vivid and pleasant listening experience. The woofer is protected by a sturdy grille, and electrical connections are made via binding posts in a recessed compartment on the speaker's back side. The same compartment also houses the transformer tap settings on versions with built-in line transformer. White color allow for an easy integration into any architectural environment. A truly versatile speaker range at an affordable price.

PRODUCT DETAILS

KEY FEATURES

2--way passive speaker system

Configuration: Low-Impedance universal impedance with built-in line transformer

Acoustically optimized cabinet shape with integrated high-frequency waveguide

Elegantly shaped, impact-resistant ABS cabinet

Driver-adapted high-grade passive crossover

Metal woofer grille

Recessed connection compartment with binding posts for input cables

Metal mounting bracket with adjustable angle included

Colore bianco

Supplied in pairs

CE/ROHS compliant

SPECIFICATIONS

4" low frequency transducer

75" Mylar high frequency transducer with waveformer

Closed box design

Frequency Response 70Hz-20kHz ± 3 dB

Sensitivity 88dB (1W/1m)

SPL 100 dB

SMW-420WT

2-WAY PASSIVE 4" FULLRANGE SPEKER WITH LINE TRANSFORMER (HIZ, 8OHM) WHITE COLOR (PAIR- 2 PCS)

Rated Power 25W RMS („T“ version with 2/4/8/16W@HiZ power taps)

2xM6 mounting points

2x Screw terminal

Dimensions W*H*D 243*151*150mm

Weight 1.65kg („T“ version 1.95kg)

Bracket included

Cabinet color	white
