DECK STAND LED RGB SOUNDCONTROL

The Zomo LED RGB 3-Channel Sound-Control will automatically change the colours and beat time of the lights according to the music you are listening to at the moment. The remote control (included) has an operational range of 10 m (max), and you can use it to control both the integrated programs in the controller, as well as the intensity of the light in your home. You can manage a total of 16 colors, change programs and select one of 4 different modes (flash, strobe, fade, smooth). The brightness and the speed of your LED strip lights are adjustable. The controller works with LED strip lights up to 144W and you can control the level of its sensitivity to the ambient sounds. You can also use it to control colorful spotlight LED Bulbs. Add this controller to your system and have the light flash/ fade along with the beat of music. This product is perfect for night clubs, restaurant, karaoke, and other commercial entertainment venues. Sheer genius and totally cool! It's ZOMO!
