PD200X

XLR/USB DYNAMIC MICROPHONE

Maono PD200X USB/XLR podcast dynamic microphone is designed for podcaster, streamers and content creators.

It has outstanding audio quality, superior noise isolation performance and is packed with features.

The dual output design allows it to be used with professional audio devices likeaudio interfaces via XLR, or connect to a computer and mobile devices directly via USB-C.

The unique 2-in-1 knob controls both microphone gain and headphone volume.

The custom-built shockmount and windfoam can effectively reduce unwanted noises.

With the free Maono Link PC/Mac Desktop App, you can also control real-time monitoring, customize RGB lighting, and take advantage of the audio processing offered by built-in hardware DSP.

HIGHLIGHTS

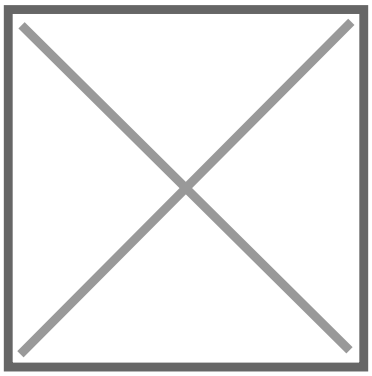

CUSTOM DYNAMIC CAPSULE

The PD200X microphone has a built-in dynamic microphone capsule that helps capture deep bass, delicate highs and clear mids. The ultra-wide frequency response of 40Hz-16KHz allows for crystal clear and clean sound. The cardioid polar pattern rejects any unwanted background noise when recording and streaming.

USB AND XLR CONNECTIVITIES

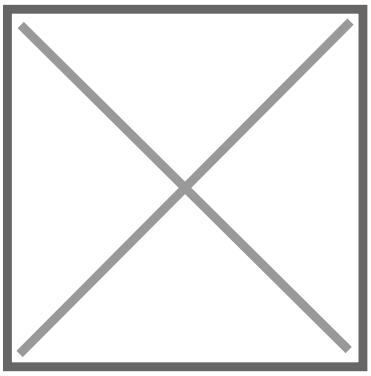

Plug-and-play while recording on your desktop or laptop by directly connecting the USB cable. XLR analog output for connection to all professional interfaces, mixers or PA systems both during podcasting and studio applications.

XLR/USB DYNAMIC MICROPHONE

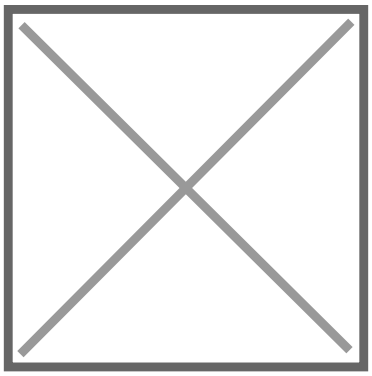

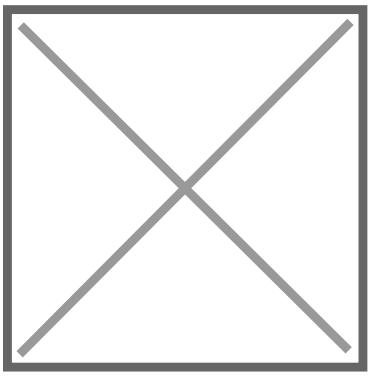

2-IN-1 SMART KNOB AND ONE CLICK MUTE BUTTON

PD200X microphone features a 2-in-1 Smart Knob to adjust microphone gain, headphone volume. With a simple click, the mute button allows immediate "mute" of the microphone. Real-time monitoring through headphones allows you to hear the sound as recording professionals desire.

MAONO LINK APP

The free Maono Link desktop app for PC/Mac lets you control real-time monitoring, customize RGB lighting, and take advantage of the audio processing offered by the built-in hardware DSP.

RGB LIGHTING CONTROL

The PD200X microphone has dynamic multi-color gradients and 8 solid-color static effects, which create a personalized atmosphere and make your streaming more attractive. Using the button located at the bottom of the microphone you can activate/deactivate the RGB function and change the colors.
