## FLIGHTCASE A-XDJ-AZ NSE

The Zomo Flightcase A-XDJ-AZ NSE is specifically designed for the **AlphaTheta XDJ-AZ DJ Controller**. It combines an elegant aesthetic with exceptional durability, making it the ideal companion for the hectic DJ lifestyle. The pitch-black look of the popular NSE (Night Style Edition) gives the case a modern and appealing appearance.

To prevent the DJ controller from slipping, the XDJ-AZ Flightcase is equipped with effective **internal padding** that reliably protects your equipment from damage, scratches, and other external influences. Specifically designed for the challenges of touring life, Zomo DJ cases are **absolutely tour-ready** and protect your valuable DJ equipment from liquids, falls, and other hazards.

The robust, **9 mm thick laminated plywood** makes the Zomo Flightcase particularly resistant to impacts and scratches. The sturdy, **black-painted aluminum profiles** and solid **ball corners** ensure high durability while giving the case professional and visually appealing accents.

The AlphaTheta Equipment Case in the stylish NSE edition not only offers outstanding build quality but also stands out as a true eye-catcher. The practical **butterfly latches** ensure that the cover stays securely closed while allowing for easy opening and closing. All NSE equipment cases can also be secured with an *optional* lock to enhance theft protection.

The **front cover** can be quickly and easily **removed** during your performance, even while the DJ equipment remains in the flight case. For added convenience, we recommend the Zomo EA-1 Ergonomic Adapter, which allows for easy connection of your DJ headphones to the mixer.
