DECK STAND - HEADPHONE STAND ACRYLIC - RGB-CONTROL

The optional Zomo Headphone-Tray - RGB Control includes an integrated LED rail and a RGB connection cable - you simply connect it to the main RGB Control, which is available as an optional accessory at our store. This stand is made from high quality clear acrylic and can be mounted in three different positions on a Zomo Deck Stand. It serves as a suspended mounting for any DJ headphones and gives the illusion that your headphones are 'floating' above the DJ devices below. The headphone stand is very stable, easy to install and a real eye-catcher.
