5 SECTION 122 CM DRUM SHIELD IN ACRYLIC MATERIAL

In the current high tech era, the science of live sound has grown prodigiously with advances in PA technology. Backline amplification has shrunk as sound reinforcement has grown exponentially. This has led to a need to reduce drummer's volume on stage on many venues without stifling his creativity and energy. Hence, audio prophylaxis for the drum set. To a soundman's delight, the assembled shield-made of clear acrylic panels substantially isolates the drums acoustically from other instruments
