

SD-110BS

14 X 6,5 COPPER SERIES SNARE

Copper shells are the newest addition to the Batterie Line. In working with this distinct material, Peace's snaredrumcraftsmen discovered a unique tonal character in it's sound. By incorporating our new lathing process into it's creation, the new line of Batterie copper snares produce the controlled overtone of a maple drum, but with the attack and clarity of a metal shell. Their sensitive and versatile tonality deliver volume when needed, and smooth, even response when expected.
