## FLIGHTCASE SET-3900 NSE

The Zomo Set-3900 NSE Setcase is made to fit two Pioneer CDJ-3000 Media Player and one Pioneer DJM-900NXS2 DJ mixer. The Set-3900 NSE extends the popular NSE series (Night Style Edition) by another equipment case. The elegant flight case is not only extremely robust but also completes every tour everyday without any problems. The high quality, laminated 9mm plywood makes the Set-3900 NSE equipment flight case highly resistant to shocks and scratches. Zomo flightcases are completely tour-suitable and take hard tour-everyday life away. Thanks to the extra wide and black painted aluminium profiles and the extra stable ball corners the Zomo Flightcase offers an absolute high durability. The high quality inner padding of the Set-3900 NSE guarantees an optimal protection of the Pioneer Player against damages and shocks. Also in terms of design the Pioneer DJ Case can inspire completely. The noble design in the dark black NSE (Night Style Edition) is simply stylish and certainly an eye-catcher. The helpful butterfly latches ensure that the lid fits extremely tightly and is easy to open and close. In addition, all NSE flight cases are lockable with an optional padlock for increased security against thieves.
