

NG-2

NG-2 PORTABLE PIEZO PICKUP WITH VOLUME CONTROL FOR NYLON-STRING GUITAR.

With onboard volume control, NG-2 is a versatile choice for guitarists who need a piezo guitar pickup to amplify the natural sound of their instrument. Live or in the studio, it's a classical guitar pickup that brings true nylon-string sound, and does it without an installation that requires modification.

Unlike other guitar pickups, NG-2 installs safely and securely on the classical or flamenco guitar tie block utilizing the tension of the strings. NG-2 is a passive classical guitar piezo pickup system designed to work flawlessly with your favorite acoustic amplifier or preamp.

Two cables are included – plug in directly with the 9-ft. 1/8" to 1/4" cable, or use the 3-ft. 1/8" to female 1/4" jumper with safety clip to connect with the instrument cable of your choice
