VS-RACK STUDIO - BLACK

The Zomo VS-Rack Studio is a practical, elegant and portable vinyl storage solution made of metal in modern design. The vinyl stand is a decorative element and a great eye-catcher in every home. Particularly practical: by simply turning the stand over, it can be used in two different ways. Once each LP is separated individually by the lamellae or all vinyls in one piece for easy leafing through. The material is made of powder-coated steel and combines durability with timeless design.
