PRO STAND UNI-12

The Zomo Pro Stand Uni-12 is suitable for the Denon CD-Player DN-S3700 as well as for other devices and CD-Players. The professional equipment console is particularly robust and hard-wearing. The Pro Stand Uni-12 is also ideal for DJs who travel a lot. The Uni-12 can be adjusted in height and inclination as well as in right-left rotation. In addition, the mounting plate for the CD player is interchangeable and can therefore be quickly and inexpensively adapted when changing devices. The Zomo Stand can easily be fixed to any table top with four screws. The optionally available base plate allows easy installation, e.g. underneath the turntable, without the need for any holes. This Pro Stand offers more protection in a moving club and more space on the DJ desk.
