

GC8W

8" PASSIVE 50W SPEAKER CEILING/WALL-MOUNTED (ROUND GRILLE, WHITE COLOR)

Versatile and Discreet High-Quality Audio Installations

The **GC8** is a passive in-wall speaker designed to deliver high-quality audio in both residential and commercial environments. It features an **8" coaxial woofer with a 1" titanium tweeter**, ensuring extended frequency response and clear, dynamic, and detailed sound.

Designed for Any Material and Any Environment

With its **130° conical coverage**, the GC8 ensures uniform sound dispersion even in large or complex spaces. The **rear-enclosure-free design** makes it ideal for mounting in plasterboard, wood, or other surfaces, leveraging the **infinite baffle principle** for optimal acoustic performance. Fully **compatible with KGEAR amplifiers and subwoofers**, the GC8 is a perfect solution for hotels, offices, restaurants, classrooms, public spaces, or residential settings.

Discreet and Customizable Design

The **magnetic grille**, available in **round or square versions**, in **black or white finish**, can be painted to blend seamlessly into any environment.

HIGHLIGHTS

FRAMELESS DESIGN FOR SEAMLESS ARCHITECTURAL INTEGRATION

The grille with no visible frame allows the GC8 to virtually disappear after installation, delivering a clean, minimalist aesthetic—ideal for refined interiors or design-sensitive environments.

ADJUSTABLE TWEETER FOR CUSTOMIZED LISTENING

The RN (round) version of the GC8 integrates an adjustable tweeter, which allows you to **precisely direct the high frequencies towards the listening area**, for a sound that is always clear and detailed, even in irregular environments or with unconventional configurations. A rare feature in in-wall speakers, which transforms architectural integration into a tailor-made audio experience.

PRODUCT DETAILS

KEY FEATURES

Wide and uniform diffusion due to 130° conical coverage: perfect for distributed sound in environments where wide and uniform coverage is needed, such as retail, hospitality, public places or conference rooms, as well as in residential and/or private settings.

Balanced audio quality: the coaxial configuration ensures a smooth frequency response (50Hz-20kHz) and better coherence between highs and mids, with a maximum SPL of 112 dB suitable for small- to medium-sized settings.

Tweeter in titanio per precisione e definizione: il titanio, grazie alla sua leggerezza e rigidità, consente al tweeter di offrire una risposta rapida e precisa, con alte frequenze brillanti e definite. Ideale in contesti dove chiarezza e intelligenza sono essenziali, come conferenze, concerti di musica acustica e spazi pubblici.

Compact and lightweight design: very easy to install in small spaces or ceiling/wall. Ideal for discreet architectural additions.

Simplified installation without any rear box: ideal for plasterboard, wood or tile walls or ceilings, taking advantage of the "infinite baffle" principle, the speaker is isolated at the rear from the large wall or ceiling in which it is installed, preventing the front and rear sound waves from cancelling each other out (phase shift between front and back).

SPECIFICATIONS

Type	Passive loudspeaker
Transducers	8" coax ferrite magnet woofer + 1" titanium dome tweeter
Frequency Response	50Hz – 20KHz (-3dB average)
Max SPL	112dB
Coverage	130° conical
Nominal Impedance	8 ?
Rated Power	50 W
Dimensions (W x H x D)	277x258x105 mm (10.9x10.2x4.1 in)

GC8W

**8" PASSIVE 50W SPEAKER CEILING/WALL-MOUNTED
(ROUND GRILLE, WHITE COLOR)**

Weight	2.04 kg (4.5 lb)
Material	ABS
Colors	White
