

SS-1M EB ALTO SAX STAR LIGATURE (METAL MOUTHPIECE))

It all started in 1974, with the original Rovner Dark, an innovative design that changed the way woodwind players thought about SS-1M ligatures. Today's Next Generation Rovner ligatures represent the next wave of Rovner innovation, featuring patented Mass-Loaded Technology™ and unique Resonating Ribs™. Rovner Products are technologically advanced to help you produce nothing less than musical magic! The value-priced Star Series is for any player seeking the ultimate in resonance. Its price belies its ability to deliver warmth and expression for even the most discerning jazz or blues player in an intimate acoustic setting. The Star Series enhances the inherent qualities of the instrument and mouthpiece without "coloring" the tone. It bathes the player in resonance, offering excellent feedback especially to the developing player with an immature embouchure, helping to improve intonation and enhancing the playing experience. Of course, the Rovner ligature you choose will be based on your own set-up, playing style and preferred sound.
