S9 NSE - FLIGHTCASE PIONEEER DJM-S9

Zomo proudly presents the Zomo S9 NSE, a professional and distinctive flightcase, which has especially been developed for the 2-channel battle-mixer DJM-S9 from Pioneer. Its exact fitting accuracy on the inside keeps the device from sliding and ensures the safe transport of the S9 mixer at any time. The flightcase protects the valuable mixer from scratches or other negative influences. Compared to other flightcase manufacturers, Zomo emphasizes the quality of the used materials above all else. Especially the extra strong and high quality plywood and the extra big profiles with very resistant ball corners have to be mentioned. In addition the case is lockable. The stylish, modern black (NSE = NIGHT STYLE EDITION) design completes the concept optically. ** The illustrated or mentioned devices are not included.
