DIGITAL DJ-BAG - BRAND - WHITE

"The Zomo Digital DJ-Bag is the ideal companion for all digital DJs who actively work with systems such as Stanton Final Scratch, Rane Serato Scratch Live, Mixvibes or Ableton Live. This bag has 2 separate inner compartments for sufficient space of the necessary accessories in digital use. In the back compartment there is room for about 40 LPs or various cables, power supplies, time code vinyls, CDs and many other small items that are needed in daily use. 4 additional outer compartments, which are located under the leather-like and very high-quality front flap flap and on both sides can hide various tickets, mobile phones and other things. Another compartment is located on the back top of the bag. A zippered trolley holder allows the transport of the digital DJ bag ""on top"" of any DJ or travel trolley. The basic equipment includes a comfortable carry handle and a shoulder strap that is fastened with Duraflex fasteners and adjustable in length. All in all a very successful bag, which is of course not only suitable for every DJ, but also for many other areas."
