TREAD-LIGHT™ VOLUME/EXPRESSION

Express yourself! Fender's Tread-Light™ Volume/Expression Pedal helps you control your stage volume for enhanced dynamic performance and also acts as an expression pedal for use with other effects pedals and keyboards. Its special under-treadle LED provides easy visibility onstage under any light, and its durable chassis and treadle are crafted from lightweight anodized aluminum, with a rubberized pad ideal for the rigors of live performance. The switchable LED indicates when the pedal is active and ready for use.
