DIGITAL DJ-BAG - ALLEN & HEATH BRAND - WHITE

"The Zomo Digital DJ-Bag is the ideal companion for all digital DJs who actively work with systems such as Stanton Final Scratch, Rane Serato Scratch Live, Mixvibes or Ableton Live. The version offered here was developed especially for Allen & Heath Xone 3D users and beautifully branded with the logo on the bold front. This bag has 2 separate inner compartments for sufficient space of the necessary accessories in digital use. In the back compartment there is room for about 40 LPs or various cables, power supplies, time code vinyls, CDs and many other small items that are needed in daily use. In the 4 additional outside compartments, which are located under the leather-like and very high quality looking front flap flap and on both sides, you can hide various tickets, mobile phones and other things. Another compartment is located on the back top of the bag. A zippered trolley holder allows the transport of the digital DJ bag ""on top"" of any DJ or travel trolley (very practical). A comfortable carry handle and a shoulder strap fastened with Duraflex fasteners and adjustable in length are of course part of the basic equipment. All in all a very successful bag, which is of course not only suitable for every DJ, but also for many other areas."
